

How To Use This NEH-654 CD

This CD uses the Adobe® Reader®, free from www.Adobe.com. It is set up to autorun, if this capability is enabled on your computer. If not,

-  Place CD into CD drive.
-  Open the file "MAIN-MENU.pdf" with your Adobe® Acrobat® or Adobe® Reader® software.

Software Requirements: See Adobe® Web site for latest specifications. No license is required. The Reader® software may be freely copied and distributed, per Adobe's user agreements. This CD does not contain any software installation program.

A Note About PDF Files: Text may be selectively copied and globally searched. Users wishing to print copies of selected pages should use the "high quality" PDF file provided. Note specific page numbers to print. Please note that the handbook has more than 1,600 pages. Graphic images may also be selectively copied using the Adobe® Snapshot tool.

How to Search the CD: To search for terminology, names, or any text, open the "MAIN-MENU.pdf" file, then do one of the following:

-  Use your Acrobat software **Search** function. Type in a key word or text. The results of the search will list all locations in the document where the key word or text occurs. Note that the search capability is realized if your Adobe® Reader® software was downloaded with this feature; or
-  Examine the **Terminology** section. This file lists key words alphabetically, along with definitions. Each term has a link to the location in the handbook where the term is described.
