About this Document

This document provides standards and specifications for selection, design and implementation of erosion and sediment control practices. This is a scanned image file of the 1997 release of the document.

This document is undergoing a periodic revision and update. The new version of this document is entitled *New York Standards and Specifications for Erosion and Sediment Control*. The GP-02-01 for Stormwater Discharges from Construction Activities points to the new title of this document as DEC's standards for erosion and sediment control. In the absence of the new release of the standards, the 1997 release of this document continues to be the reference document for standards and specifications for erosion and sediment control.
